eDiscovery & Litigation Support

Overview

eDiscovery & Litigation Support services

How important to you is speed, efficiency, legal expertise and technical excellence in your eDiscovery partner?

Digicore offers a state-of-the-art, trusted, and highly cost effective end-to-end eDiscovery service.

Applying preservation, collection & processing legal principles to large volumes of electronic information is second nature to our highly experienced consultants. In short, we talk your language, and can become an invaluable part of your focused litigation team with minimum fuss.

Our data processing capability runs at industry leading speed, giving you peace of mind that comprehensive, high quality results can be achieved fast, and at minimal cost.
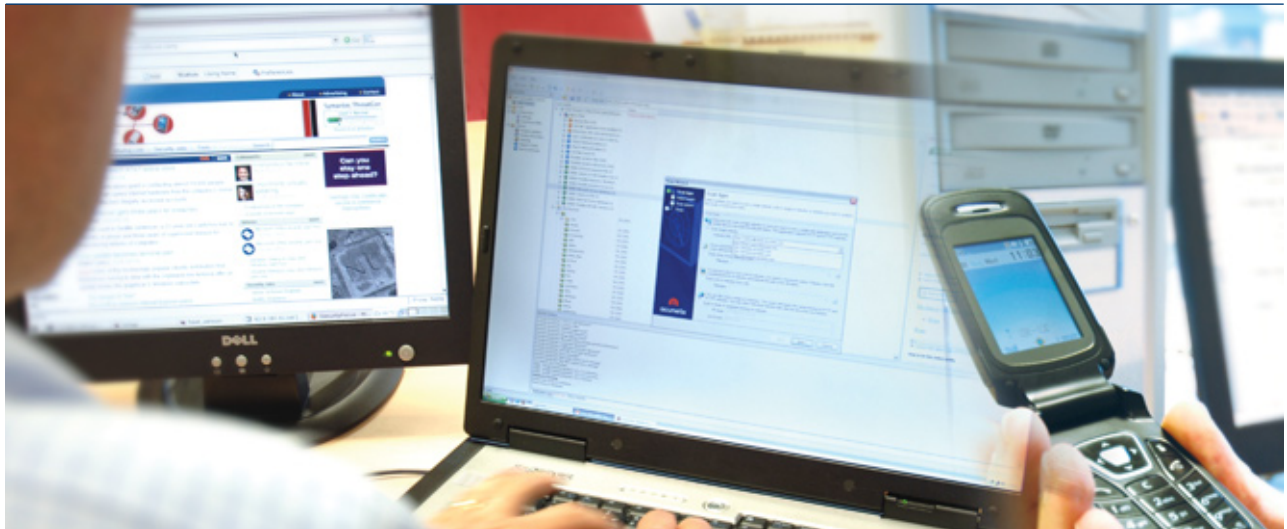

The complexities and legal ramifications of the eDiscovery process demand an unfailing commitment to correct procedure at all times. 7Safe co-author the UK Government sanctioned "good practice guide for computer based electronic information". We are qualified experts in ensuring that electronic information is optimised for your use.

How 7Safe's & Digicore eDiscovery experts can help

7Safe's & Digicore eDiscovery division brings an exceptional technical knowledge base and proven project management ability to its clients. We can help you streamline the litigation process by locating and securing the requisite electronic evidence in a highly efficient manner.

We will help maximise your chances of a successful litigation by:

- Identifying, preserving and documenting potential sources of electronic evidence in compliance with the preservation order

- Processing the acquired data to extract only the relevant & responsive data

- Hosting a sophisticated online review platform

- Assisting with culling and search strategies/techniques

- Assisting with preparation and presentation of electronic evidence

❖ The Benefits of our progressive eDiscovery approach include:

- Ensuring compliance with preservation and production responsibilities

- Minimising the time and cost of data processing – through class leading technology

- Ensuring chain of custody right from the point of collection through to legal review

- Minimising disruption to the data source environment

- Fixed cost and highly secure online review of documents

- Accessible online tools to search & review data easily - according to your selected criteria

- Immediate, world-wide, large team response capability

Employing trusted 7Safe electronic discovery experts to focus on the acquisition and technical manipulation of eDiscovery data frees you up to focus on the legal strategy and delivery aspects of the case.

Together we can deliver the right evidence, in an easily understood form, to help maximise its positive legal impact.
